Director

From the Director . . .

As this year rapidly comes to its end, it seems appropriate to share with all of you my feelings of appreciation for the many contributions made to the Center by students, faculty, and staff.

The brick, mortar and steel which make up the physical structure of the Center are given life and vitality, a reason for being, through the teaching, learning, sharing, laughter and even tears, which enter by its doors every day.

All of you make possible the successful accomplishment of the Center's goals, and to all of you I say, "Thank you."
